Key Findings

PRODUCT PERFORMANCE

- Tablet led revenue at \$684.54K, closely followed by Laptop (\$684.42K) and Printer (\$684.39K) — top 3 products are tightly competitive
- Tablet also recorded the highest quantity sold at 2,600 units, confirming strong and consistent demand

REGIONAL PERFORMANCE

- North region generated the highest revenue at \$968K out of \$4.38M total
- East region led in order volume with 311 orders, slightly ahead of North with 309 — North wins on value, East wins on volume
- Store D was the standout location with \$1.21M in revenue highest across all store locations
- Ryan manages the North region, the highest revenue-generating region

PROMOTIONS

- Promotions drove 75.47% of total revenue — the business is heavily promotion-dependent
- Free Ship led all campaigns at \$1.24M, followed by Winter15 at \$1.08M and Save10 at \$0.99M
- Promo Lift of 2.08 means promoted periods generate over 2x the revenue of non-promoted periods

SALESPERSON PERFORMANCE

- Bob led the team with \$797K, followed by Alice (\$786K) and Frank (\$715K)
- Diana recorded the lowest revenue at \$677K — gap between top and bottom is \$120K

REVENUE TREND

- Revenue has been on a consistent decline from \$532K in March to \$256K in October — an overall drop of 51.9% over the period
- Immediate investigation needed into whether this is seasonal or structural

Recommendations

PRODUCT

- Maintain strong inventory levels for Tablet, Laptop and Printer — all three are closely matched and any stockout risk could shift revenue significantly
- Investigate why revenue is so evenly spread across top products — pricing strategy may need adjustment to create a clear market leader

REGIONAL

- Replicate Store D's strategy across underperforming store locations — identify what drives its \$1.21M performance (location, staffing, product mix)
- East region has high order volume but lower revenue than North — suggests smaller basket sizes. Consider upselling or bundling strategies in East

PROMOTIONS

- With 75.47% of revenue tied to promotions, the business carries significant risk during non-promo periods — develop a strategy to grow organic revenue
- Prioritize Free Ship and Winter15 in next campaign calendar given their proven revenue performance
- Promo Lift of 2.08 is strong — consider increasing promotion frequency strategically

SALESPERSON

- Review Diana's pipeline and provide targeted support to close the \$120K gap with top performer Bob
- Investigate Avg Discount of 7.31% at salesperson level — identify if any individual is over-discounting without proportional revenue return

OPERATIONS

Data Limitations & Notes

- Analysis covers 2,000 orders with a total revenue of \$4.38M
- Return rate of 24.80% is based on flagged orders only — unreported returns are excluded
- Promotion lift compares promoted vs non-promoted order revenue — external market factors not accounted for
- Delivery days calculated from order date to delivery date only — excludes processing and dispatch time
- Recommendations are data-driven and should be validated with operational and business context before implementation
